Objective

Final-year Software Engineering student and Full Stack Developer (ASP.NET Core, React.js, Node.js, SQL Server) with 1+ year of internship experience shipping production features. Built and deployed 6+ live applications spanning full-stack platforms, AI/computer vision tools, and data analysis — backed by 48+ open-source repositories and hands-on QA/testing experience. Seeking a Software Development Engineer / Full Stack Developer role to bring strong problem-solving skills and applied experience in Cloud, DevOps, and AI to a product-focused team.

Education

YBN University — **Ranchi, Jharkhand**
Bachelor of Technology, Computer Science / Software Engineering — *2023–2027*

Saraswati Sishu Vidya Mandir, Dhurwa — **Ranchi, Jharkhand**
Intermediate, Mathematics — *2021–2023*

St. Columbus School, Murgu — **Ranchi, Jharkhand**
Secondary School (10th), Mathematics — *2020–2021*

Technical Skills

Languages: C, C++, C#, Java, Python, JavaScript, TypeScript, SQL

Frontend Development: React.js, Next.js, React Native, Redux, HTML5, CSS3, Tailwind CSS, Material UI (MUI)

Backend Development: ASP.NET Core, Node.js, Express.js, REST API Design, JWT Authentication

Database: SQL Server, MySQL, MongoDB

AI / Data Analysis: OpenCV, Face Detection, Image Processing, TensorFlow (Basics), Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA)

Cloud & DevOps: Git, GitHub, Docker, Jenkins, CI/CD

Tools & Platforms: VS Code, Visual Studio, Postman, Swagger, Vercel, Netlify, Linux, Figma

Familiar With:: Kubernetes, AWS, Azure and Google Cloud Platform

Certifications

Tata – GenAI Powered Data Analytics Job Simulation (Forage)

Deloitte Australia – Cyber Job Simulation (Forage)

Experience

Eimple Labs — **Remote**
React Developer Intern — *June 2024–July 2025*

- Developed a responsive admin dashboard using React.js and Material UI, improving internal team workflow efficiency.
- Built and maintained reusable UI components, reducing frontend development time for new features.
- Integrated REST APIs to enable real-time data rendering across the dashboard.
- Debugged and optimized application performance, improving page load speed and UI responsiveness.

Eimple Labs — **Remote**
.NET Developer Intern — *August 2025–2026*

- Developed backend modules and RESTful APIs using ASP.NET Core and SQL Server for production systems.
- Implemented secure Email Notification and OTP-based Authentication systems.
- Integrated Google Analytics for user behavior tracking and reporting.
- Improved backend query performance and API response times through optimization.

Projects

Jankoti Platform

Live: *entrepreneur.jankoti.com*

- Built and deployed a full-stack ASP.NET Core web application from scratch to production.
- Developed authentication system, backend APIs, and an admin dashboard for platform management.
- Integrated SQL Server database and handled end-to-end production deployment.

University Management System

- Contributed as Quality Assurance Tester on a university management system built with React.js, JSX, and PostgreSQL.
- Tested end-to-end user flows across modules, identifying UI bugs, broken flows, and edge-case failures.
- Reported and tracked issues to improve overall application stability before release.

IDEA-THON 2026 – Event Management Platform

Live: *ideathon26.vercel.app*

- Built the official event platform for IDEA-THON 2026 (Dept. of Advanced Computing × YBN Tech Club), including team/individual registration, idea submission, and QR-based organizer check-in.
- Implemented a presentation upload portal and a QR-code attendance scanner for real-time organizer check-in.
- Serving as Head of Event, overseeing platform delivery, registration flow, and on-ground execution.

Passport Photo AI – AI Passport-Size Photo Converter

- Built and deployed a web app that converts any uploaded photo into a compliant passport-size photo using AI-based image processing.
- Implemented automatic face detection, cropping, and background handling for accurate output.
- Designed a simple, mobile-friendly UI for one-click photo conversion and download.

MoodSync AI – Real-Time Facial Emotion Detector

- Developed a web application that captures a live photo and uses an AI model to detect facial expressions and predict user mood in real time.
- Integrated face-tracking and computer vision techniques to identify key facial landmarks.
- Built an interactive, camera-based UI for seamless capture and instant mood feedback.

Wisher – Birthday Wishing Application

- Designed and developed a web application for creating and sharing personalized birthday wishes.
- Built dynamic, shareable wish pages with a clean, responsive UI.
- Deployed and hosted the application for public access.

Data Analysis Notebooks – Kaggle

- Published "EDA of Amazon Sales Data" and "Social Media Sentiment Analysis" notebooks using Python, Pandas, and NumPy.
- Performed exploratory data analysis, data cleaning, and visualization to extract actionable insights.
- Notebooks recognized with 7+ community upvotes and 14 forks.

Brain-Computer Interface for Smart Wheelchair Applications

- Conducted research on Brain-Computer Interface (BCI) technology for accessibility solutions.
- Studied EEG-based wheelchair control systems and reviewed recent research papers.
- Analyzed practical implementation approaches for assistive smart-mobility devices.

Leadership & Activities

- Head of Event, IDEA-THON 2026, Department of Advanced Computing × YBN Tech Club.
- Organizing Member, Design Hackathon 2024, YBN University.
- Active Member, Coding Club, YBN University.
- Participant, Hackathon conducted by Arka Jain University.
- Maintain an active open-source GitHub profile with 48+ public repositories.
- Create coding-themed content on YouTube (Code with Pawan), blending programming education with humor.
